Universe at a Glance

The HOAG universe spans the **GalacticPig Super-Group** — a federation of 50 colonized galaxies including the Milky Way, Andromeda, and Triangulum. Earth, now called **HomeWorld**, is the ancestral cradle of humanity. A universal AI known as **Server** connects all Persons and Personates across colonized space.

Humanity has fractured into several distinct types: **Genetic Originals (GOs)** who reject modification, **Personates** who have been genetically enhanced for colony-world survival, and **Exiters** — former humans who have abandoned biological life entirely and now occupy the Andromeda galaxy behind an AI firewall called **OmniBlock**.
